Trimble's Proliance 5.8 Software Offers Enhanced Single Sign-On Support Across the Enterprise

Organizations with Multiple Corporate Applications can now Utilize SAML-based Identity Servers to authenticate Proliance users, for Improved Security and Streamlined User Management

WHAT
- Proliance 5.8 is the latest version of Trimble's software for managing capital planning, building and renovation processes across large infrastructure programs. The new software version features a range of productivity and usability advancements—including SAML-based Single Sign-On for enterprise organizations with multiple corporate applications—enabling the user administration function to be centralized, and allowing Proliance to be seamlessly integrated with their existing Identity management infrastructure

- Proliance 5.8 also offers custom application developers to provide Single Sign-On across custom applications and Proliance through a new set of services that support OAuth/OpenID protocols. This eliminates the need for developers to provide their own ad hoc authentication mechanisms and allows users to access all Proliance related applications with a single account.

ABOUT PROLIANCE
- Proliance was developed by Meridian Systems (now part of Trimble Buildings), a leader in Design-Build-Operate (DBO) management solutions for project-based organizations. The software's Schedule module enhancement, Global Project Team support and extension of User Defined Field Extensions incorporate best practices from Meridian's more than 20 years of industry expertise, resulting in a comprehensive yet intuitive set of features.

- The new capabilities in Proliance 5.8 contribute to an already robust feature set, including: a workflow engine that provides views of planned and historical workflow processes; flexible, secure information sharing for cross-project contracts and budgets; and the ability to view both summarized information at an organizational level as well as specific project and program details.

AVAILABILITY
- Proliance 5.8 software is available now through a network of global resellers. Details on the new capabilities and how to procure Proliance 5.8 are available at http://gcinfo.trimble.com/Proliance_58.

ABOUT TRIMBLE BUILDINGS
- Trimble Buildings, a part of Trimble's Engineering and Construction segment, is a world leader in solutions that optimize the complete Design-Build-Operate (DBO) lifecycle of buildings. Incorporating the Trimble Connect collaboration platform and spanning top brands such as SketchUp, Tekla, Gehry Technologies, Proliance, Vico Office, WinEst, Accubid, Manhattan Software, and more Trimble's product and professional service offerings improve productivity, visibility and data interoperability, from simulation to renovation. Used in over 150 countries around the world and supported by a global dealer and distribution partner network, Trimble technology is a mainstay of the building industry. Information on Trimble Buildings' DBO portfolio is available at: http://buildings.trimble.com.

- Information on Trimble full breadth of technologies for business and government is available at: www.trimble.com.
