Enterprise Data Manager	Centralized and collaborative estimating allows for estimates to be archived and shared within the enterprise.
	Team and user-based security ensures that proprietary data is protected.
	You define the process of how the estimate moves through critical estimating phases.
Schedule Link	Create cost loaded schedules directly from the estimate – no more duplicate entry.
	Perform what-if scenarios, such as resource leveling and changing the dependencies between tasks.
	Two-way interface with MS Project and Primavera, which dramatically reduces time required to load individual tasks with supporting estimate details.
Virtual TakeOff	Powerful on-screen take-off tool that enables you to perform takeoffs directly from your PC screen.
	Sort and separate your objects on individual layers for enhance viewing, printing, and presentation capabilities.
OST Integrator	WinEst's OST Integrator works seamlessly with On Center's On-Screen TakeOff software to make the most of your takeoff data.
Estimating Databases	Estimating data for a variety of industry sources. Optionally available with assemblies pre-configured.
