

WinEst Virtual Takeoff, V14

WinEst's Virtual Takeoff is a powerful on-screen takeoff tool that enables you to perform takeoffs directly from your PC screen. With Virtual Takeoff, you can do your takeoff anywhere, anytime. Manage your takeoffs easier and integrate seamlessly with WinEst Estimating. Virtual TakeOff takes you to the next level.

- › **Go Paperless** — generate takeoffs directly from your computer screen using electronic plans. Virtual Takeoff's ease of use and advanced technology allows you to generate your takeoff anytime and anywhere.
- › **Integrate to WinEst Estimating** — Virtual Takeoff is dynamically linked to your WinEst estimate file. Any change you make to your takeoff will automatically be reflected in your estimate.
- › **Manage Your Takeoff** — manage your takeoff through advanced features for greater area and item recognition and comprehensive control.
- › **Color Coding** — differentiate your estimate's layered items for enhanced recognition and navigation.
- › **Multi-layer support** — sort and separate your objects on individual layers for enhanced viewing, printing, and presentation capabilities.

Virtual Takeoff lets you takeoff different items from multiple drawing layers. Supported digital-image formats include cal, jpg, gif, png, pdf, dwg, bmp, pxt, tif and pln.

- › **Built-in symbol library** — resizable shapes and symbols allows you to track and differentiate between different takeoff items and features.
- › **Input Text during Takeoff** — annotate drawing images with your takeoff notes or questions.
- › **Area Fills** — see your completed work with customizable images, fills and colors.
- › **Advanced Plan Navigation and Viewing** — micro-to-macro views enable easy viewing of your entire plan or just the finest details:
- › **Clear Scroll-Bar Navigation** simplifies on-screen positioning within your plans.
- › **Customized Views** enable plan inversion and brightness controls for easy viewing, and let you view the dimensions of areas, objects, or lines directly on your takeoff.
- › **Panning Window** enables easy navigation, location and place selection.
